

What Our Quality Alliance Members Are Saying

"The Quality Alliance is a wonderful opportunity for community physicians to demonstrate that we follow and achieve quality guidelines. Quality patient care is something insurance companies value and they are willing to compensate physicians who can demonstrate that they have achieved quality results."

Edward Rosenthal, MD

Dr. Rosenthal, an internist in Garfield Heights, discusses why he chose to be part of the Quality Alliance.

"The monthly data collection process is seamless. Our normal business operations are not affected at all."

Isabel Guadiz, MD

Dr. Guadiz, a pediatrician in North Olmsted, reviews some of the data entry with her office staff, Katelyn Stanley and Angel Leonard.

"We have completed our testing for Valence and found the process to be extremely simple. The people at Valence were very easy to work with and extremely helpful. We ended up doing only three test runs before it was working with no problems. Future reporting is set up on our EMR system with a very simple process to submit data."
